Great! Now for scoring yourself. Please understand that there are no failures, only feedback and it's OK. You can't change what you can't see – so let's get to your truth – so you can change if you think that's helpful.

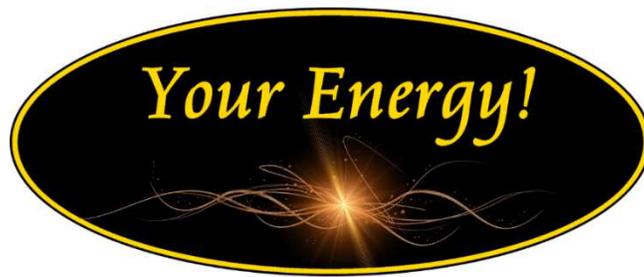

**The questions are organized below and will help you see *where* your energy loss is focused:**

Questions 1-7 are about whether you **give** your energy away.  
 Questions 8-14 are focused on whether you **leak** your energy.  
 Questions 15-21 are focused on whether you **lose** your energy.

**Now, let's generate an overall score:**

For every answer in the left side/column, give yourself a 10.  
 For every answer in the middle/column, give yourself a 5.  
 For every answer on the right side/column, give yourself a 0.

**And for general guidelines on the scores:**

**A total score under 50** - means you still lose your energy/power, but it's only in some areas or it's only occasionally. You tend to be fairly balanced in life and you value your self-worth highly. You're also fairly balanced in your energy expenditures, but check if there is a particular area you are losing energy in and focus there – or whether you're spread out between give, leak, or lose.

**A score of 50-150** - means you are losing a significant amount of your power and energy. You would benefit from doing work on this since you need your energy for your own life! You are likely someone that wants others to be happy or you're not aware of exactly how much your mind makes you lose energy – so you may be an empath, caretaker or pleaser personality, doing all you can for everyone around you, but not taking the best care of yourself. Since you are losing, leaking or giving away energy often (again maybe only in some situations or with some people), look at the areas and ways you're losing energy and focus on those to start.

**A score over 150** - means that you are leaking, losing and giving away energy all the time and it must be so hard! You are most likely an empath, caretaker or pleaser personality, doing all you can for everyone around you, but not taking the best care of yourself and your needs. This level of energy loss is not sustainable and at some point you are going to 'blow' – whether physically or emotionally - and since that's rarely fun, really consider getting coaching or some means to help you reclaim your power - because you deserve it!
